Source: KBI Global Investors as of 31/03/24. The risk characteristics are calculated independently by KBI Global Investors using monthly gross returns of the composite over a 10 year period relative to the Index as at the 31/03/24. Portfolio and Benchmark Statistics are from a representative account managed to the same strategy and the benchmark respectively. KBI Global Investors independently estimate these statistics for both the portfolio and the benchmark. The AUM listed above is Global Equity Integris Global AUM excluding Assets under Advisement from Q1 2022. Weighted Avg. Mkt. Cap figures are in US Dollars. KBI calculate the Weighted Average Carbon Intensity figure for the portfolio (representative account managed to the same strategy) quarterly. Index carbon intensity data is sourced from MSCI ESG Research. KBI calculate the ESG scores for the portfolio (representative account managed to the same strategy) quarterly. Index ESG ratings are sourced from MSCI ESG Research.

Investment Philosophy

We are "total return" investors.

Our conviction is that companies with the financial strength and discipline to maintain and grow their dividend commitments outperform.

Uniquely, we find such companies across all capitalisations, and in every sector and every region, even ones where dividends are low and not typically used as a method of analysis. By "looking where others don't look" we consistently find and exploit mispriced stocks.

The main reasons for outperformance are:

- Quality of information
- Better governance
- Plentiful positive earnings surprises
- Capital efficiency and financial discipline
- Lower volatility
- Better valuations

Annualised Performance (£)

KBI calculate both composite returns and benchmark returns. Returns are gross of fees in GBP. Our firm claims GIPS compliance and is annually verified by an independent verification firm to be so. The verification report from our verifier and our GIPS composite presentation are available upon request. The performance record disclosed here is that of the firm's composite for this strategy. The Integris Global strategy is a well-diversified, all cap, strategy that invests across all 24 industry sub classifications and the four major geographic global regions (North America, Europe, Japan and Pacific Basin ex Japan) of the global developed equity market. This strategy is constructed on a segmented basis by industry and region (as defined by the MSCI World Index) and no active currency management is undertaken. The strategy invests purely in those companies that pay above average dividends relative to their industry peer group. The investment process currently utilizes a security level ESG-rating provided by a third-party firm to assess whether a security will be traded within the strategy. We established Integris as our corporate brand for our screened offerings in 2019. The material risks associated with the composite include market risk and stock-specific event risk. Share prices can decline and there is a risk that the composite may under-perform its benchmark. The benchmark is the MSCI World Index, inclusive of net income. The Net index provides a better comparator for potential investors and representation of the investment strategy of the composite. The benchmark is designed to measure the equity market performance of developed market countries. The benchmark is market-cap weighted. Sources of foreign exchange rates may be different between the composite and the benchmark; but not materially so. MSCI benchmark returns assume the reinvestment of dividends after the deduction of withholding taxes. See disclaimers for further information.

Investment Process

We summarise our process into three steps

Step 1

- Create regional industry group segments from MSCI Index.
- Eliminate stocks below segment average yield.
- Lower yield stocks, countries, industries will qualify.

Step 2

- Eliminate stocks and segments that fail sustainability, quality and growth criteria.
- Eliminate stocks with lowest ESG score.
- Rank remaining stocks.

Step 3

- Create portfolio targeting preferred financial criteria, ESG criteria and highest ranked stocks.

Current Integris Global Portfolio Characteristics

Mkt. Cap \$bn	Strategy	MSCI World Index	+/- %
<3 (small)	0.1	0.0	0.1
3-5 (mid-small)	2.2	0.2	2.0
5-10 (mid)	6.9	2.7	4.2
10-25 (mid-large)	32.7	11.0	21.7
>25 (large)	58.2	86.2	-28.0

Overview

Given the importance we place on dividends, cashflows and avoiding speculative exposures, aggressive bull markets aren't always an easy place to achieve outperformance.

On the total return front, North America is demonstrating different dividend growth behaviour to that of other international markets. Dividend growth continues to slow there while we are see improving dividend growth in other regions. This is particularly evident in Japan where shareholder payout improvements are very much on the agenda. We carefully increased our exposure to higher dividend growth relative to the index.

The diverging regional trend does not only apply to dividend growth. The total payout available in regions such as Europe and Japan is now more attractive than in North America. Dividend yield levels are higher (including in traditionally low yielding Japan) and buybacks via share destruction are now at similar if not better levels. We took advantage of this change in behaviour and increased our exposure to total payout yield (dividends + buybacks) over the period.

Our relative valuation, across most measures of value, remains our largest style exposures relative to the market. Valuations at an index level have moved considerably over the past 2 years. The forward price earnings ratio of MSCI North America is now at 21x (with MSCI World at 18.8x), driven primarily by the AI and large cap technology trades. The discount we hold versus MSCI World continues to run at between 30-45% depending on which valuation measure is used. We believe our relative valuation bias is attractive especially when combined with the other characteristics we offer.

Disclaimer

KBI Global Investors Ltd is regulated by the Central Bank of Ireland. Please note that, as of 1 January 2023, KBI Global Investors Ltd. has withdrawn from the UK's Temporary Permissions Regime (the "TPR") on the basis that the firm is availing of an exclusion available for overseas persons. KBI Global Investors claims compliance with the Global Investment Performance Standards (GIPS®). Gross results shown do not show the deduction of investment management fees. A client's actual return will be reduced by the management fees and any other expenses which may be incurred in the management of an investment account. For example, a £1,000,000 investment with an assumed annual return of 5% with a management fee of 0.85% would accumulate £8,925 in fees during the first year, £48,444 in fees over five years and £107,690 in fees over ten years. Under MiFID II this is deemed marketing material and should not be regarded as investment research. The firm is defined as the institutional business of KBI Global Investors Ltd., and its subsidiary, KBI Global Investors (North America). The term 'institutional business' shall have the meaning of all pensions, charity and corporate asset management strategies of the firm as they pertain to client funds. Unitised clients are specifically excluded from composite assignment given that their underlying unit holdings are already assigned to composites and such strategies are therefore accounted for in composite values and returns. The firm definition has been re-defined on two occasions over recent years; on 30 September 2010 to reflect the firm's sale to RHJI by our previous parent firm KBC Asset Management NV, and on 1 October 2016 to reflect the firm's sale to Amundi Asset Management. No change in investment process arose as a result of these sales. To receive a copy of the compliant presentation and/or a list of composite descriptions, please contact sales@kbigi.com. **IMPORTANT RISK DISCLOSURE STATEMENT:** This material is provided for informational purposes only and does not constitute an offer to sell or the solicitation of an offer to purchase any security, product or service including any group trust or fund managed by KBI Global Investors Ltd, or any of its affiliates (collectively, "KBI Global Investors"). The information contained herein does not set forth all of the risks associated with this strategy, and is qualified in its entirety by, and subject to, the information contained in other applicable disclosure documents relating to such a strategy. KBI Global Investors Ltd's investment products, like all investments, involve the risk of loss and may not be suitable for all investors, especially those who are unable to sustain a loss of their investment. The views expressed in this document are expressions of opinion only and should not be construed as investment advice. Past performance may not be a reliable guide to future performance and the value of investments may fall as well as rise. Investments denominated in foreign currencies are subject to changes in exchange rates that may have an adverse effect on the value, price or income of the product. Income generated from an investment may fluctuate in accordance with market conditions and taxation arrangements. Performance for periods of more than 1 year is annualized. All MSCI data is provided "as is". In no event shall MSCI, its affiliates, or any MSCI data provider have any liability of any kind in connection with the MSCI data. No further distribution or dissemination of the MSCI data is permitted without MSCI's prior express written consent. Net total return indices reinvest dividends after the deduction of withholding taxes, using (for international indices) a tax rate applicable to non-resident institutional investors who do not benefit from double taxation treaties. The products mentioned in this Document may not be eligible for sale in some states or countries, nor suitable for all types of investors. In some tables and charts, due to rounding, the sum of the individual components may not appear to be equal to the stated total(s)
